MANAGEMENT SUMMARY

The North Carolina Department of Transportation (NCDOT) proposes to construct a bypass to the north of Wilmington, North Carolina, within New Hanover and Brunswick Counties (Federal Aid No. STP-17(1), State Project No. 8.U250901, TIP No. R-2633A/B and R-2633C). An *Historical Architectural Survey Report for the Wilmington Bypass* was prepared by Greiner, Inc. for NCDOT and the Federal Highway Administration (FHWA) in August, 1994. This report covered northern and southern alternatives that generally extended from Interstate 40, between its southern terminus and the Castle Hayne interchange in New Hanover County, westward across the Northeast Cape Fear and the Cape Fear rivers into Brunswick County, then southward to US 17 in the vicinity of Town Creek. In August, 1995 Greiner submitted to NCDOT and FHWA an addendum to this report entitled *Addendum to an Historic Architectural Survey Report for the Wilmington Bypass*, which assessed the National Register eligibility of the Tinga Nursery within the project's Area of Potential Effect (APE).

In July, 1996 Greiner conducted a reconnaissance-level survey of two additional alternative corridors within New Hanover and Brunswick counties extending from the Northeast Cape Fear River to the vicinity of Bishop (Figures 1 through 5). Greiner identified and photographed 18 historic architectural resources that appeared to be more than 50 years old located within the APE of these corridors. On August 8, 1996 representatives of NCDOT, FHWA, and the North Carolina State Historic Preservation Office met to review photographs of these 18 resources, identified as Properties A through F and H through S. Based on the historic information available and the photographs, the parties present at the meeting agreed that none of the properties were considered eligible for National Register listing and that no further evaluation of them was necessary (see Concurrence Form for Properties Not Eligible for the National Register of Historic Places, following Figure 5). This Addendum includes maps showing the APEs of the two additional corridors, a copy of the Concurrence Form, and photographs of the 18 resources. Because no National Register-eligible historic architectural resources were identified within the APEs of the two corridors--other than the Goodman House and Doctor's Office, which was reported on in depth in the August, 1994 Survey Report--no additional survey report has been prepared beyond this Addendum.
